

## Dayton Region Israel Trade Alliance

The Dayton Region has a rich history of world changing innovations and inventions, e.g. the cash register, laser weapons, and of course - the airplane!

The region is a hub of Advanced Manufacturing and cutting edge technology, with a highly skilled and creative workforce. The Dayton Region is within a day drive of 53% of the U.S. population, 63% of US manufacturers, and most of Canada's population – providing easy access to markets.

Dayton is home to Wright Patterson Air Force Base (27,000+ employees) and the Air Force Research Laboratory (\$4.5B annually), providing unsurpassed opportunities in HLS, Defense, and Aerospace technologies. Healthcare technology opportunities are driven by 28 hospitals and 7500 care-providers interested in innovative Israeli technologies.

**DRITA** promotes collaboration with companies of all sizes and industries – 350 Business Documents and Agreements already signed between Israeli and Dayton Region entities! We look forward to opening doors for additional Israeli businesses interested in the Dayton Region and the US.
